Conclusion

Introduction

Platform migration in Kation

- An initiative called 'Right Planning' is conducted
 - to migrate old rate plans to new rate plans
- Business goal: To standardize the rate plans & enhance customers' experience and users' experience.
- Decided to launch a pilot campaign.

Analysis Goal & Objective

To assess pilot campaign performance before implementing to the entire customer base.

- To evaluate the effectiveness of 'Right Planning' pilot campaign.
- To determine campaign takers' profile.
- To predict campaign takers based on usage and revenue behavior.

Dataset Description

Campaign data in customer level

- Demographic
- Usage before and after campaign
- Revenue before and after campaign
- Status before and after campaign

👎 Inconsistent value:
'?' and 'unspecified' is
same

👎 Inconsistent value:
more than 13 states

Explore

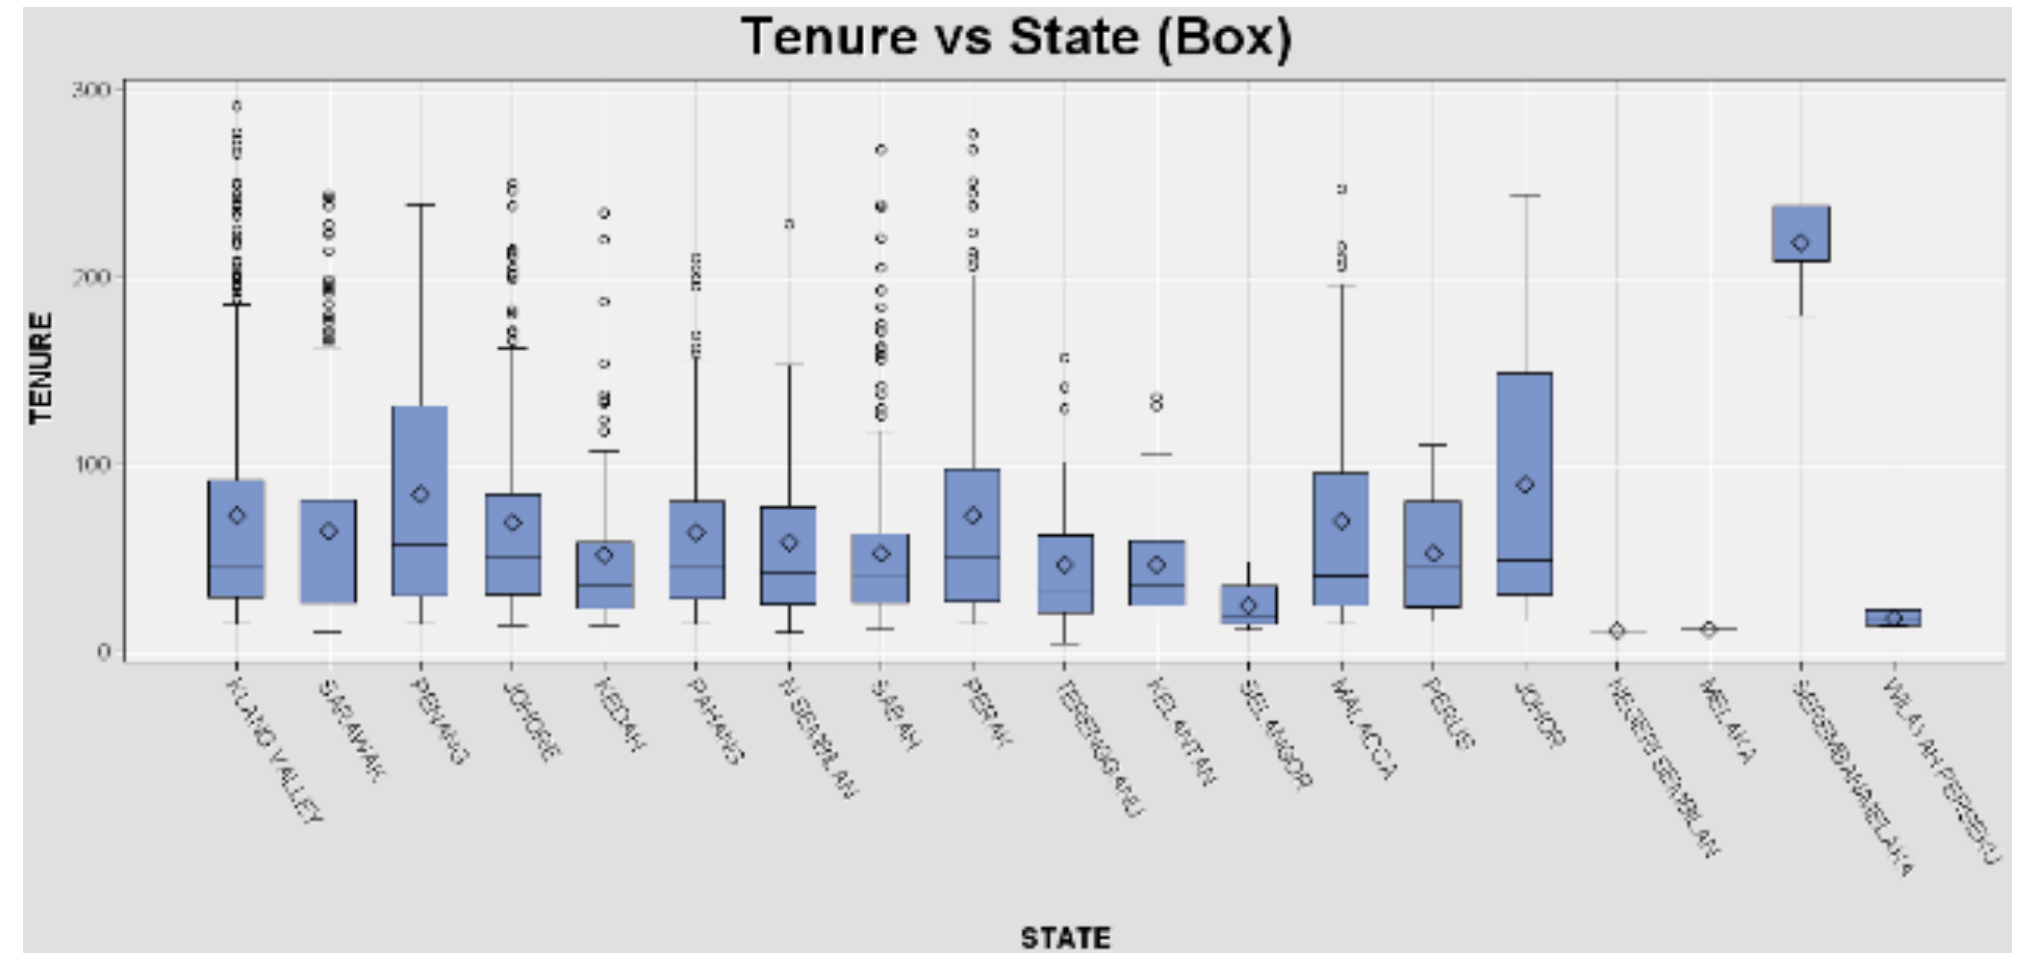

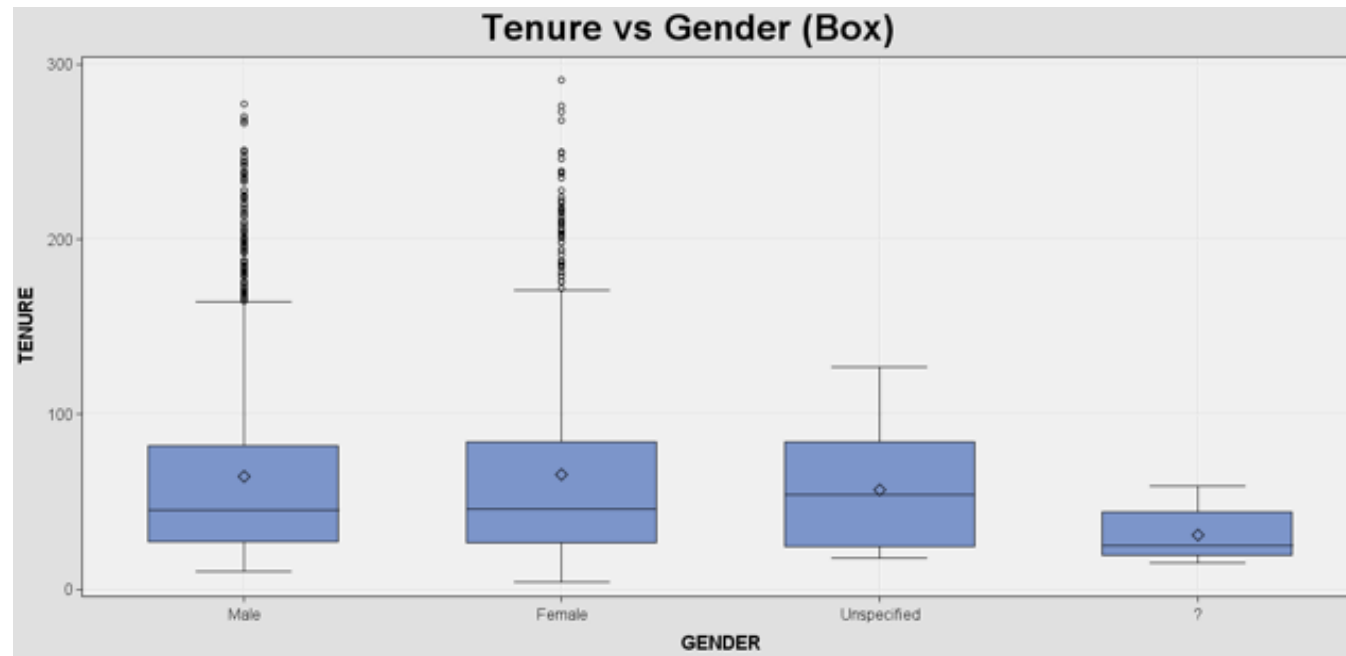

Bivariate Analysis

- Males likely to join campaign, most participants from Klang Valley, median age of 34 for both, median tenure of ~45

Explore

Bivariate Analysis

- Similar tenure distribution for both male & female)
- Younger age = shorter tenure
- Varying tenure gap in all states – surprisingly short tenures in Kedah

Explore

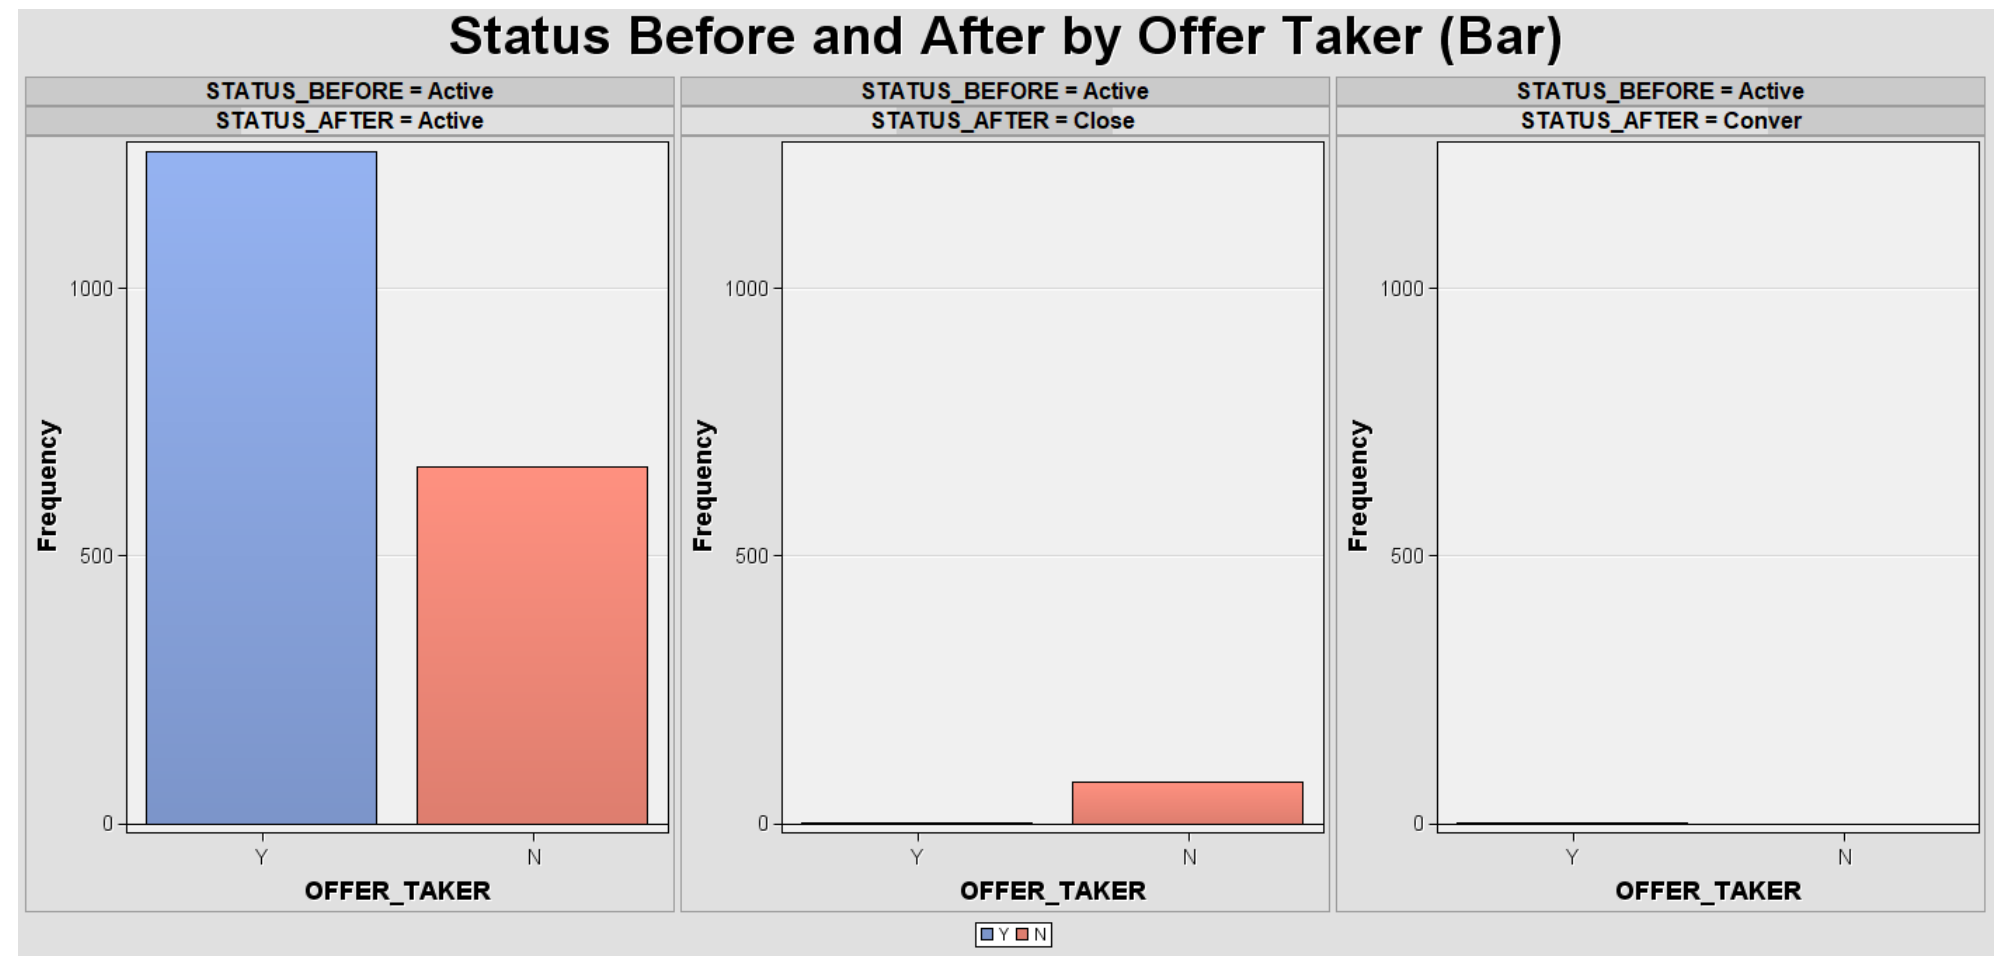

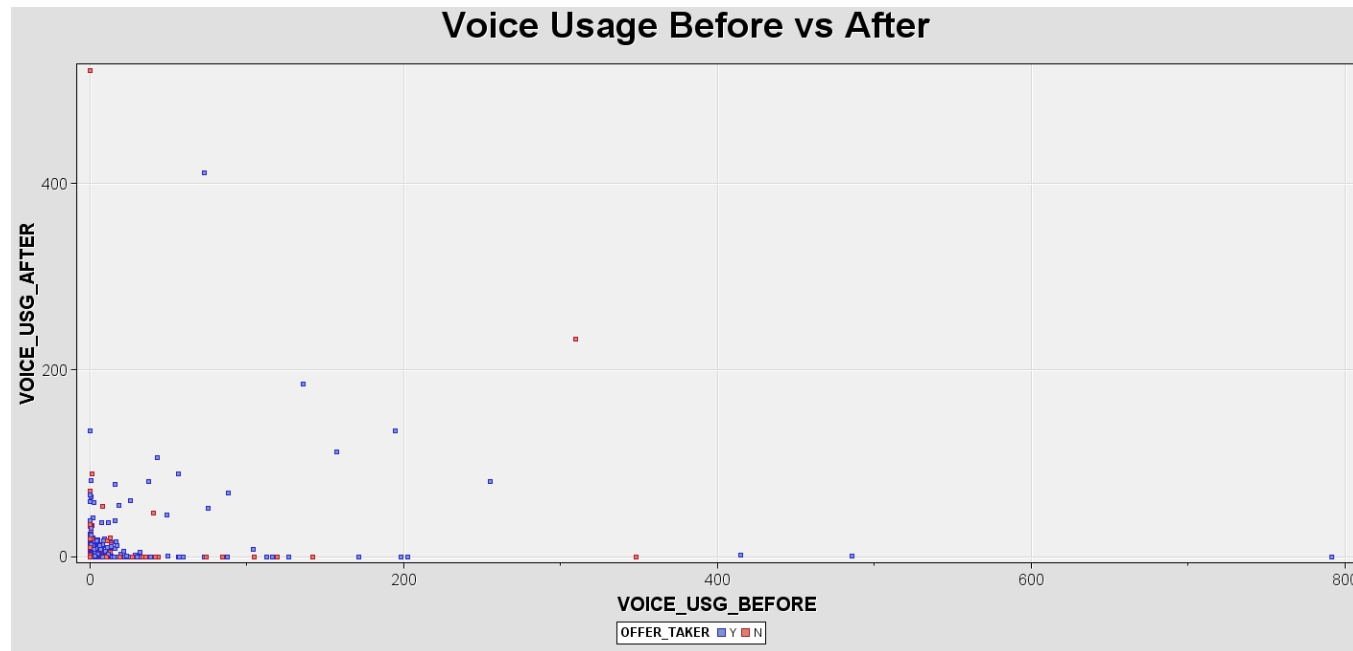

Bivariate Analysis

- Exceptionally young group of participants in Terengganu and Kelantan
- Similar median age for male and female (~34)
- Sabah has the most customers with undisclosed gender

Explore

Multivariate Analysis

- No significant changes on the data and voice usage before and after campaign
- Takers more likely to remain active while non-takers more likely to churn

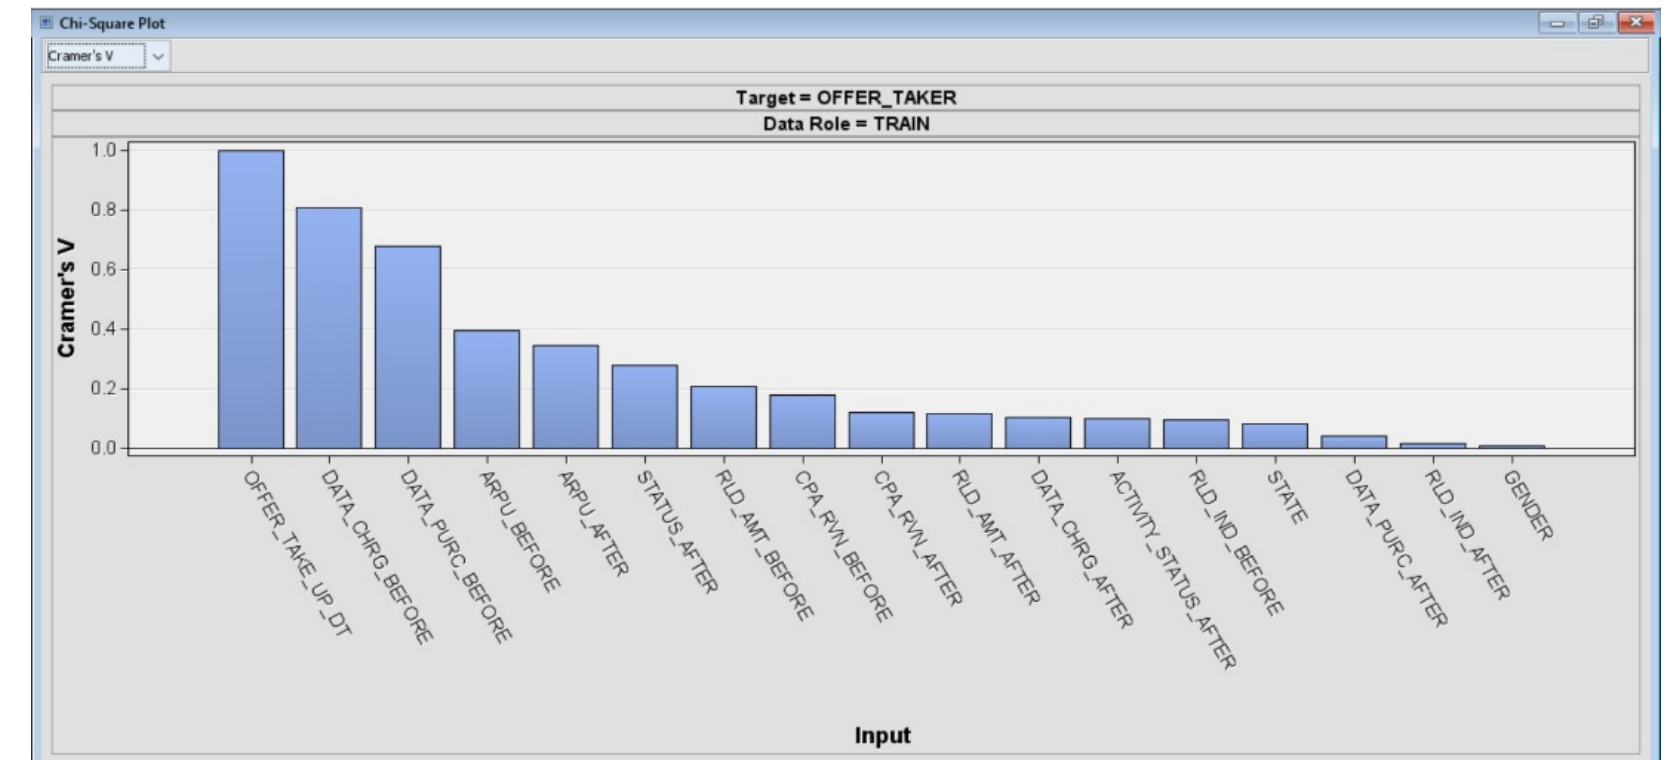

Explore

Correlation Analysis

For interval variables:

- No correlation value > 0.9
- No variables were removed

For nominal variables:

- OFFER_TAKE_UP_DT showed a prefect association

Conclusion

The dataset needs to undergo pre-processing as there are incomplete, noisy, inconsistent and intentional data.

Based on exploration, overview and hypothesis are generated and will further justify in the process of Modify, Model and Assess.

01

To assess the effectiveness of “Right Planning” pilot campaign

- 4573 takers (63% opt in rate)
- 2921 takers remain active after campaign (64% active rate)
- **Moderately success**

02

To identify campaign takers' profile

- Target group is sample of Kation's prepaid Malaysian
- Higher opt in rate among male
- Age group between 22 - 36 years old with tenure > 1 year
- Mostly from Klang Valley, then Sabah and Sarawak

That's a wrap!

Thank you.
